(54) INFORMATION REPORTING SYSTEM

(57)Abstract:

PROBLEM TO BE SOLVED: To provided an information reporting system wherein confirmation of information is easy, by switching at least a part of the information, such as place of bright illumination is intensifies in display at night period, so that a timely information is more conspicuous than other information.

SOLUTION: While a car is running, a main map information is displayed on a display device, and at a specified set time during pre-set night period (for example, 6 P.M.), a part of the display (main map information) of display device is automatically switched to a display which displays other information (ambient information wherein a place of bright illumination is intensified based on car's current position) Thus, during night period, a pachinko parlor with bright illumination is intensified in display, to be more conspicuous than other information (main map information).
